

POLICY STATEMENT

Bitrez Ltd specialises in the design, development and manufacture of synthetic resins, polymers and industrial chemicals serving a diverse number of market sectors.

We are committed to achieving and maintaining the highest level of service to our current and future customer base in all aspects of our business. It is our policy to ensure compliance with prevailing legislative requirement and where possible surpass these requirements to protect the welfare of our staff, our customers and the public. We have evaluated our product range under the REACH regulations and are committed to ;

- Compliance with the REACH regulations in accordance with the directives given and to the time scales dictated
- Alignment with responsible suppliers to ensure continuity of raw material feed stocks
- Resolution of any supply issues and material source management to ensure conformance
- Registration of materials manufactured or imported
- Offering assistance with customer assessment, exposure data and usage
- Promotion of information interchange to further assist with safety, environmental and regulatory requirements
- Satisfying new safety data sheet requirements
- Look at substitution work for problematic materials and hazardous compositions

With further commitment to satisfy subsequent stages of the REACH implementation process in accordance with the timelines provided in the regulations to ensure;

- Preparation of chemical safety assessments in a timely manner
- Preparation of chemical safety reports in a timely manner
- Exposure assessments are made in accordance with requirements
- We assist with the provision of data in business specific consortia and SIEFs
- Confirmation of our end use registration
- Confirmation of our customers end use registration
- Development products are formulated for compliance with regulatory requirements from concept.

Our policy on REACH will be reviewed periodically and updated as necessary. We are confident of compliance and continuity of supply of the product portfolio currently offered by the Company and the development programs working for future demands. We believe that the REACH regulations present opportunities, not restrictions and compliance will not hinder our innovative approach to business. We will continue to offer highly efficient technical service and will be extending the scope of our research and development functions. We are confident that REACH will not restrict our future supply or development strategy and should not impede those made by our customers. Special care will be taken to protect commercial and technological strengths. We feel that for confidential applications it will be appropriate to work closely with customers on how to best safeguard technology and ensure that proprietary information is protected.
